JANUARY 1992 THROUGH DECEMBER 1992 — 1184 PAGES

HOW TO USE THIS INDEX: Most feature material has been indexed three or more times—once by the title under which it was published, again under the author's last name, and finally under one or more of the subject categories or railroads. Photographs standing alone, as in the "Railroad News Photos," "Photo Section," or departments, are indexed (usually under the railroad), but photographs within a single-subject feature are not usually separately indexed. News items are indexed under the railroad and/or category, and news stories are indexed the same as feature stories. Most references to people, or quotes by them, are indexed under the railroad or company with which they are easily identified; if there is no such easy identification, they may be indexed under the person's last name. Maps, radio frequencies, rosters of locomotives and equipment, book and video reviews, and organizations largely of a volunteer nature (such as museums and railroad historical societies), are indexed only under those categories. Items from countries other than the United States and Canada are indexed under the country. Numerals are indexed in alphabetical order as if spelled out; "article" words (a, an, the) are omitted when alphabetizing an index. Please note that prior to this year, TRAINS' volume numbers covered November-October, with Volume 51 covering November 1990 through December 1991 to make the adjustment.
